

**What do I want to learn or understand better?**

We are talking about using Java and Java Spring together with html and css. I have never used Java Spring so i need to look into that. Most of my time will be spent on reading the book Scrum and xp from the trenches.

**How can I help someone else, or the entire team, to learn something new?**

We all study at 'datavenskapligt program' at the University of Gothenburg and have similar experiences, but with different strengths. We need to get to start working more closely together to understand the differences between us.

**What is my contribution towards the team's use of scrum?**

I have no real concept of what scum is, so I will start to look into the subject.

**What is my contribution towards the team's deliveries?**

I made the schedule so we could meet and finish this weeks deliveries. I will look into making a scrum board for next week's deliveries.
